**Learning to read begins before children start school. Help your children develop early literacy skills now; this makes it easier for them to learn to read once they begin school.**

**TALKING** with children helps them learn oral language and stimulates brain development, which underlies all learning.

**SINGING** and rhyming increases children's awareness of and sensitivity to the sounds in words. This helps prepare them to decode written language.

**READING** together, or shared reading, remains the single most effective way to help children become proficient readers.

**WRITING** and reading go together. Writing helps children learn that letters and words stand for sounds and that print has meaning.

**PLAYING** is one of the main ways children learn about the world. General knowledge is an important literacy skill that helps children understand books and stories once they begin to read.
